# Envisioning a Sustainable Community

This activity is adapted from NatureBridge.

Time: 15-30 minutes

Materials: Paper, pencils/pens, colored pencils/crayons/markers (optional)

---

1. **We all want a future that is sustainable and thriving, and part of getting there is imagining what it would look like! Take out a blank sheet of paper and draw your answer to the following questions: What kind of community would you like to live in? If you had the power to create your ideal, sustainable community, what would it look like?**
2. **As you draw, you can think about these questions as well:**
    a. Where would people live?
    b. Where would they work?
    c. How would they get to their schools and workplaces?
    d. On their days off, where would they go and what would they do?
    e. What kind of a house would you live in?
    f. Where would you shop? How would you get there?
    g. What kind of energy would be used for heating? For transportation? For travel? Where would it come from?
    h. How would the air, water, and environment be kept clean?
3. **Share your drawing! Feel free to email it to [morgan.florsheim@cumberlandrivercompact.org](mailto:morgan.florsheim@cumberlandrivercompact.org)!**
