WATER SCAVENGER HUNT

We use water every day and need it to live, but we don't always spend much time thinking about it! Let's explore the water all around us.

Somewhere you can get water. 	A place water goes when it rains. 	A creature that can swim.
Something that needs water to live 	A puddle 	A place where animals get water. A creature that spends some of its life in water. 	Something in your home that uses water. 	A food that you eat that needs water to grow. 
Where does the water you drink come from?
Ask an adult or do an internet search to find out!
